EXPERIENCE

React / React Native Developer
Bewise

07/2021 - Present

Tasks

- **Financial Management Platform (current)** – Contributing to the development of real-time financial dashboards, automated credit-spreading workflows, and approval systems. Designed a scalable architecture with React 18, TypeScript, TanStack Query, TanStack Router, and Zustand.
- **Delivery Apps** – Developed and maintained a set of delivery applications used by thousands of users. Implemented Firebase for analytics and real-time storage, Stripe for payments, and Apple/Google authentication. Improved performance through memoization and modern libraries.
- **Security Camera Monitoring App** – Developed and maintained an app for real-time highway security camera monitoring. Built interactive maps with geolocation, and optimized performance by reducing loading times and improving image management for a smoother experience.
- **Fauna Landing Page** – Redesigned and maintained Fauna's landing page using Next.js. Implemented accessibility and UI/UX improvements that increased conversion rates.
